

Dial-Up Instructions for Windows Vista

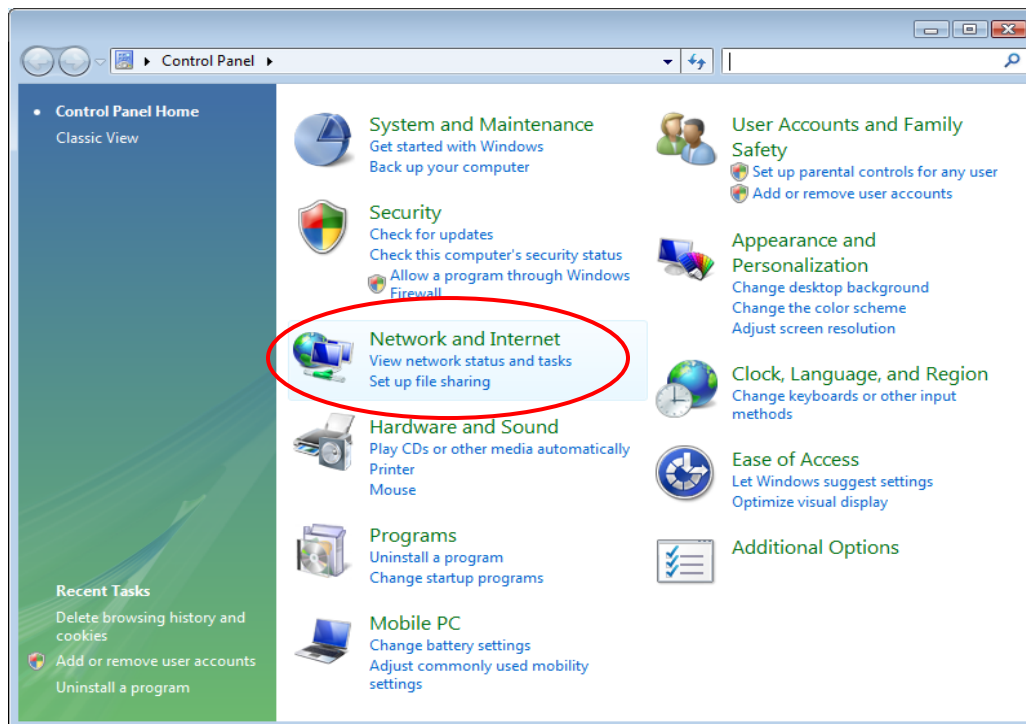

Cahaba Government Benefit Administrators®, LLC (Cahaba)

Follow the steps below to ensure dial-up networking is established and operational on your personal computer (PC) using Windows Vista.

1. Click on the “Start” button. Open the “Control Panel”.

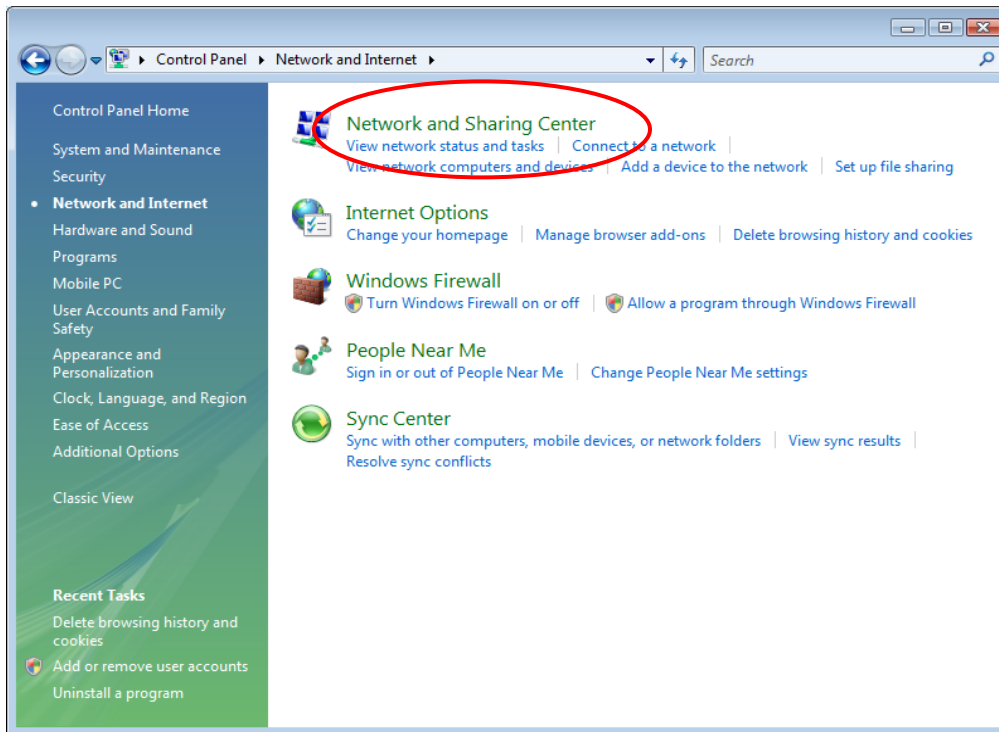

2. Click on “Network and Internet”.

6. Type the telephone number **1-205-988-8282** in the “Dial-up Phone Number” box to connect with Cahaba. **Enter this phone number without dashes or hyphens. Type the phone number the same as you would if you were calling out on your phone line (e.g., enter a number (9) to dial an outside line).** You may also need to add a long distance pass code to the end of the number. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct.
7. Type your AS5300 User ID in the “User Name” box.
8. Tab to the “Password” box and type your AS5300 Password.
9. Click “Connect”.

Set up a dial-up connection

Type the information from your Internet service provider (ISP)

Dial-up phone number: 1.205.988.8282 [Dialing Rules](#)

User name: GAxxxxxxxx

Password: ●●●●●●●●
